**NOTE:** Performance specifications are for truck with standard equipment. Performance specifications are affected by the condition of the vehicle and how it is equipped as well as the nature and condition of the operating area. If these specifications are critical, the proposed application should be discussed with your dealer.

MAST DIMENSIONS

Lift heights over 240" (6096 mm) maximum fork height may require reduced capacity depending upon OEC dimensions.

<sup>\*</sup> Capacity will be reduced with 228" and 240" masts and 41" outriggers. Refer to High Lift Sheets.

Right angle stack and equal intersecting aisle dimensions provided with a 40" wide x 48" long pallet load, allowing zero clearance.

<sup>1</sup> Speeds are the same in either direction, with or without rated load. Steer angle <10 degrees.

CERTIFICATION: These Hyster® lift trucks meet the design and construction requirements of B56.1-1969, per OSHA Section 1910.178(a)(2), and also comply with the B56.1 revision in effect at time of manufacture. Performance specifications are for a truck equipped as described under standard equipment on this technical guide. Performance specifications are affected by the condition of the vehicle and how it is equipped, as well as by the nature, condition of the operating area, proper service and maintenance of the vehicle. If these specifications are critical, the proposed application should be discussed with your dealer.

TRAVEL SPEEDS (24V)

Note: Speed limits are for trucks at operating temperature with fully charged battery. Speeds are the same in either direction, with or without rated load.

For lift heights between 24.0" (610 mm) and 150.0" (3810 mm), traction speed is reduced when steering angle exceeds 10°.

\* Travel above 150.0" (3810 mm) fork height requires a high level traction option. Capacity reduction

Contact your local dealer for additional information.

Battery compartment length is measured from front to rear.

Battery compartment width is measured across truck.

SB175 amp "red" connector, cable position B, cable length 16" (405mm). Maximum cable gauge 1/0 AWG.

Battery with lid will not fit in battery compartment.

Amp hour capacity min/max 24-volt truck 560/770. Battery weight range min/max 900 -1200 lb.
