

SPRINT base.line

Single-sided drilling and dowel insertion machine

NEW

More flexibility

- Horizontal and vertical drilling station can be freely configured and retrofitted in grid 32 (max. 3 spindels)
- Intelligent clamping and machining of two different workpiece thicknesses simultaneously
- Clamping cylinder especially for narrow parts
- Dowel diameter 6, 8 and 10 mm possible
- Standard equipment with NC-controlled Z-axis
- Even extra long workpieces can be inserted and clamped

WARRIED THE DESCRIPTION OF THE PROPERTY OF THE

optimized ergonomic working

- Centrally placed 18.5" touch screen with Beckhoff control system
- ✓ Lower hopper conveyor for easy and safe dowel refilling

modern and compact design

- Side-mounted maintenance door
- Space-saving design for easy integration into production and reduced delivery costs

easy handling

 Simple, self-explanatory machine operation thanks to equipment with new KOCH user interface

SPRINT base.line

Single-sided drilling and dowel insertion machine

Overview of basic equipment

- 4 working fields
- ✓ Workpiece length 1,300 mm
- Horizontal drilling station with 1 drilling spindle
- Glue and dowel insertion station
- 2 NC axes (X & Z)
- KOCH WOP parametric programming
- 3 pneumatic lowerable stops (center and side stops)
- Premium Remote Support network card and module for remote maintenance
- USV low voltage power supply

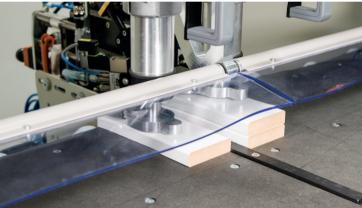

- Control cabinet with A/C unit
- + Vertical drilling station from top with 1 drilling spindle
- + Additional horizontal and vertical drilling spindles (max. 2)
- + Extension of dowel diameters (6 & 10 mm)
- + Electronic glue control ELC (patent granted)
- Barcode reader
- + Automatic workpiece width detection

Accelerated production process and exact reproduction for

- Carcass furniture
- Drawers
- Frame parts
- Solid wood parts
