

## ***Preparation for the reception and installation of your machine***

### **LDT Railings. | Centateq P-210 | 0-250-88-0826**

Please note that your equipment is ready to be delivered to you. In order to guide you in the necessary preparations that you are responsible for, it is important to acknowledge the following :

#### **Before the reception of your machine, you must cover the following points:**

- Be aware of the technical specifications necessary for the installation and define its location using the installation plan (layout).
- The floor must meet the specification set out in the layout. The customer declares that the thickness of the floor is \_\_\_\_\_In/mm.
- According to the terms and conditions of the sales contract, the second payment of the machine must be made before machine delivery or as per agreed including applicable taxes, before installation.
- Be advised that one hour free of charge is included to unload the container. Any additional waiting time will be invoiced as per carrier's rate. Apprx 90 \$/h.

#### **Before the installation of your machine, you must cover the following points:**

- The power must be routed to the location of the electrical connection of the machine (as specified in the layout). An Internet connection must be available for the Teleservice function.
- Ensure that the compressed air is routed to the location of the machine. (as specified in the layout)
- Insure that the dust extraction is routed to the location of the machine. (as specified in the layout)
- Insure you have the proper materials for the testing and training on the machine.(Ex: edge, glue, board, etc.)

**NESTING MACHINE:** Insure to have a MDF (Medium Density Fiberboard) as a spoilboard.

Please complete, sign, date and return this protocol before receiving your machine.
