REF	QTY.	PART #	DESCRIPTION	Unit	Extended
A	1		Circuit A&B Pump System Double Intake and Supply with Isolation Valves Designed for one pump system to supply resin to circuit A, flush circuit A, flush and charge circuit B	\$18,929	\$18,929
	1	GG P15ESB	Pump, Duraflo, 3400/430		
	1	GG 2S5143	Kit, Brackett, Mounting		
	1	GG 210090	Assy, Red Alert HP 60 Mesh Filter, BB841008		
	1	GG 222121	D/S Regulator, 1/4in, SS, 150-1200 PSI, BB845010		
	1	GG 25R488	Regulator, BP, Mechanical, Low-Flow, BB845000		
	1	DD HFR-L-511	Cleanair Filter-Regulator Unit, 120 CFM		
	2	AP RGBKT	Alu Regulator Bracket, LP & HP Aro/Binks		
	2	AP 34-55-SS-1	3/4 in Sihon Hose Kit Assm, SST		
	2	AP SS3/8	Return Line Assembly		
	2	DD QS-5012	Closed Top Drum Agitator		
	2	EF PA18-5-FFSS	1/2 in x 5 ft Hose Assy		
	10	EF PA18-5-FFSS	3/8 in x 5 ft Red Hose		
	4	SS 5404-08-08	1/2 x 1/2 Hex Nipple		
	4	UC SGF-4	1/2 FNPT x 1/2 FNPT SS Ball Valve		
	2	SS 1404-08-08	1/2 NPTF(M) x 1/2 NPSM(F) Swivel Adapter		
	2	SS 1400-08-08-08	1/2 NPTF(F) Tee		
	1	SS 5405-08-06	1/2 x 3/8 Hex Nipple		
	1	SS 5404-16-08	1 in x 1/2 Hex Nipple		
	2	SS 1404-16-12	1 NPTF(M) x 3/4 NPSM(F) Swivel Adapter		
	4	SS 5502-06-06	3/8 Street Elbow, SS		
	1	SS 5404-06-06	3/8 x 3/8 Hex Nipple, 316 SS		
B	1		Circuit A Spray Guns Circuit B Plugged / Not in Use	\$12,035	\$12,035
	1	HFC-500	Machine Coalescent Filter / Main Air Supply		
	8	GG 268571	Gun, AA, Auto, WL		
	8	GG 288224	AA Manual Fan Control Manifold		
	16	EF 70-220	Gun Swivel, 1/4NPS(M) x 1/4NPS(F)		
	16	HO 4-5	1/4NPS(M) x #5 JIC(F) Swivel Adapter		
	16	HO 4-4-60	1/4NPS(M) x 1/4NPS(M) 90 Degree Adapter		
	16	HO-4P	1/4NPS(M) Plug		
C	1		Pre Assembled Pump Stand Miscellaneous Fittings, Tubing & Hardware PSI proposes to fabricate one tubular pump stand complete with compressed air header. The pump stand will have one pump mounted and plumbed for final field connections, compressed air and tubing. The high pressure pump is used for delivery of topcoat to circuit A. Likewise, the pump can be used to flush circuit A. And the pump can be used to charge circuit B to pressurize rotary seal chamber with flush material. The advantage of pre assembling the equipment onto a pump stand reduces field installation cost. PSI proposes to mount the back pressure and downstream regulators for automatic spray gun application in the spray machine including all necessary hoses and fittings. The tubing, valves, fittings and regulators will be mounted on a structural tubing and unistrut frames for a compact floor mounted design next to the spray machine.	\$7,568	\$7,568
D	1		Mechanical Installation Includes installation for start up by Barberan technician PSI proposes to provide the necessary tools and labor to professionally install the equipment. Tasks include connecting the pump stand to the spray machine, with a point of connection for compressed air. Installing a coalescent filter on the spray machine for point of connection for compressed air. Installing the spray guns and hoses onto the spray machine rotary carousel. Compressed air supply must be made during installation period. Coating supplier must have topcoat and flush material on site during installation period. PSI will prepare equipment for perform start up by Barberan technician. PSI will coordinate and familiarize local distributor for pump and spray equipment support. All expenses associated with installation are included: Flights, Rental Vehicle, Hotel, Per Diem and Incidentals.	\$12,716	\$12,716
			TOTAL		\$51,249
E	1		Estimated Freight Actual freight will be billed separately upon completion Delivery: 9 Weeks ARO & Down Payment Terms: 80% down NET 10 Days 20% upon installation completion NET 30 Days	\$4,394	\$4,394
